Fire, Building & Life Safety Division				
Deferral of Fire Protection Plans		PAGE	1 of 1	Revised: 5/13/2008
Category: Plan Review	Code Reference: 2006 IFC Section 105.4			

PURPOSE

This form documents the requirements for deferred submittal of fire protection plans, including, but not limited to; fire sprinkler, fire alarm, and hood suppression systems and provides an efficient and thorough plan review process

REGULATION

Fire protection plans shall be submitted for plan review, plans shall be approved, and all necessary fire protection permits issued within 45 calendar days of the issuance of the building permit. In addition, no rough (frame, electrical, plumbing, or mechanical) inspections shall be scheduled prior to the issuance of <u>all</u> fire protection permits. This form was implemented to assist with the development process to allow sufficient time for the fire protection contractor to be selected and to provide a complete plan submittal (engineering plans, along with installer's shop drawings).
